

With vertical lite walls at the ramp and perimeter, this 4-story precast parking benefited from natural light and ventilation.

3,200 LF of Barrier Cable Systems were utilized to provide pedestrian fall protection and vehicular restraint. Face-mounted cables at perimeter, and embedded anchors at the ramp were used to achieve the Design Team requirements.

PROJECT: Kincora Blocks
(August 2019) Herndon, VA

CLIENT: The Shockey Precast Group

ARCHITECT: Polleo Group

OWNER: Tritec Real State Company
